Autism Diagnostic Assessment Service
Strive and Thrive Therapy & Fono Speech Therapy

Who are we?
Our team includes Katiane, a Speech Pathologist & Hannah, an Occupational Therapist. We are both qualified and experienced autism diagnosticians.

Who we assess?
We assess children between 3 and 16 years of age.

What is the process?
1. Obtain a referral from your child's GP or Paediatrician for our service.
2. You will have an initial MS teams meeting with a therapist to ensure that there is sufficient evidence and justification to progress with an autism assessment.
3. The therapists will collect more information from your child's school or day care.
4. The assessment day will take place at your home. It will consist of a 1:1 assessment with your child, followed by an interview with relevant caregivers.
5. The therapists will link you in with a Clinical Psychologist for a 'confirmation assessment' of the findings.
6. You will receive a diagnostic report, outlining a diagnostic outcome.
7. This diagnosis needs to be signed off by a Paediatrician within two years.

What is the cost?
We tailor assessment packages, depending on your child's presentation and assessment history. Our assessment packages range between $1,450 - $1,950 plus travel fees.

What is the wait time?
We are generally able to book in the initial screening meeting within 1-2 weeks, and the assessment day within 2-4 weeks from first contact.

Unsure where to begin?
We are always available by email or phone call to answer any questions. Please contact us on the details below.
